EDUCATION

University of Texas at Dallas

Master of Science in Business Analytics and Artificial Intelligence
Scholar with High Distinction

Richardson, TX
August 2024 - December 2025
GPA: 3.92

University of Texas at Dallas

Bachelor of Science in Biology, Minor in Psychology
Dean's List, Academic Excellence Scholarship, Cum Laude

Richardson, TX
August 2020 - May 2024
GPA: 3.87

SKILLS

Programming Languages: Python, SQL, R

AI & ML: LLMs (OpenAI, Anthropic), TensorFlow, PyTorch, Scikit-learn, CNNs, Vision Transformers (ViT)

Analytics & Data Platforms: Splunk, Snowflake, Power BI, Tableau, Alteryx, Microsoft Excel, Logi Composer

Automation & Process Mining: Power Automate, UiPath, Celonis

Cloud: Microsoft Azure

PROFESSIONAL EXPERIENCE

NCR Atleos

Product Analyst

Frisco, TX
January 2026 - Present

- Resolved a critical payment data pipeline misconfiguration, recovering **\$1M** in revenue and restoring transaction data integrity.
- Engineer AI-powered fraud detection models for ATM cash deposits using Splunk and Azure, automating fraud decisioning and claim validation while reducing manual investigation effort.
- Design Python and Power Automate solutions to automate anomaly detection across enterprise ATM estates, strengthening data integrity and improving operational efficiency.
- Build transaction-level financial models to evaluate ATM interchange calculations, quantifying business impact and increasing visibility into network-level revenue performance.
- Drive enterprise AI adoption by identifying capability gaps, developing enablement initiatives, and operationalizing AI solutions across business teams.

Product Analyst Intern

May 2025 - August 2025

- Led cross-functional validation of ATM branding profiles with IT and Payments teams, providing revenue assurance and contractual compliance across a **\$12.2M** portfolio.
- Developed a Python automation tool for ATM branding profile validation and creation, increasing configuration accuracy by **140%** while reducing manual effort.
- Built financial business case models using Excel and Logi Composer to evaluate strategic partnerships, supporting executive decisions on profitability and pricing.
- Partnered with product managers to develop executive presentations and pricing models that supported deal structuring and revenue optimization.

Center for Advanced Pain Studies

Research Analyst Intern

Richardson, TX
June 2022 - May 2024

- Analyzed 200+ scientific images using NIH Image and ImageJ, applying ANOVA and GraphPad Prism to improve research workflow efficiency by **30%**.
- Organized and maintained 500+ experimental datasets using Excel, improving reporting accuracy and project management efficiency.
- Mentored new researchers in laboratory procedures and experimental techniques, increasing team productivity by **150%**.
- Authored laboratory SOPs and protocol documentation that improved procedural consistency and increased experimental success rates by **80%**.
- Co-authored a peer-reviewed publication in Cephalalgia Reports on stress-induced migraine mechanisms.

PROJECTS

MemorAI

Artificial Intelligence Society

August 2024 - December 2024

- Built a multimodal deep learning solution using Vision Transformers (ViT) and Convolutional Neural Networks (CNNs) to analyze neuroimaging data.
- Performed data preprocessing and augmentation to improve model generalization and optimize training performance.
- Fine-tuned PyTorch and TensorFlow models using transfer learning, improving predictive accuracy while reducing model training time.
